WORK EXPERIENCE

Senior Software Engineer | Capgemini

Oct 2022 - Present

- **Developed scalable microservices using Spring Boot and RabbitMQ** to streamline order processing and real-time notifications for a global restaurant chain.
- **Reduced order processing time by 25%** by optimizing API integrations and implementing asynchronous messaging.
- **Implemented Discovery Server (Eureka)** to enable seamless service registration and improve system availability by 30%.
- **Designed REST APIs with comprehensive Swagger documentation**, ensuring smooth third-party platform integration.
- **Enhanced the Restaurant Chain's web platform using ReactJS, Redux, and React Hooks**, improving page load times by 20%.
- **Optimized relational database schema in PostgreSQL**, reducing query response times by 40%.
- **Managed the entire deployment lifecycle using Docker and Kubernetes**, ensuring consistent environments across development, testing, and production.
- **Monitored and optimized application performance using Prometheus and Grafana**, reducing system bottlenecks and improving uptime.
- **Achieved over 87% test coverage using JUnit, Mockito**, ensuring high-quality code and robust functionality.
- **Configured an API Gateway** to secure and efficiently route API traffic between client-facing applications and backend services.
- **Contributed to a 20% reduction in operational costs and improving the overall SDLC** by automating manual processes and enhancing system reliability.
- **Delivered high-quality features as part of an Agile team**, adhering to sprint deadlines and exceeding client expectations.

Java Full stack Developer (Internship) | Capgemini

Mar 2022 – Jun 2022

- **Built 5+ microservices using Spring Boot**, integrating features like authentication, payment processing, and order tracking.
- **Developed responsive and interactive UI components using ReactJS**, improving customer engagement and usability.
- **Integrated RabbitMQ for asynchronous communication**, ensuring efficient task processing and scalability.
- **Designed and managed relational schemas in PostgreSQL**, reducing data retrieval times by 30%.
- **Conducted rigorous unit and integration testing using JUnit, Mockito, Jasmine, and Karma** to ensure bug-free code.
- **Maintained detailed API documentation using Swagger**, simplifying integration and collaboration with other teams.

PROJECT

BookMyFlight

- *Technologies used* : Java, Spring Boot, MongoDB, React JS
- **Developed a scalable flight booking system using Java Spring Boot**, enabling online flight reservations and secure customer transactions.
- **Developed REST APIs with proper exception handling, logging and Junit test cases**, ensuring the reliability and quality of the application.
- **Collaborated with the team in developing the frontend using React.** [Github](#)

Technical Skills

- *Programming Languages*: Java, JavaScript
- *Front-end Technologies*: React
- *Back-end Technologies*: Spring Boot, Spring Security, JWT Authentication, OAuth Authentication
- *ORM Tool*: Hibernate / JPA
- *Build Tool*: Maven
- *Databases*: MySQL, MongoDB, DynamoDB,
- *Cloud Platforms*: AWS, GCP
- *API Documentation*: Swagger
- *Testing Tools*: Junit, Mockito, Jasmine, Karma
- *Version control*: Git, Github, AWS CodeCommit

EDUCATION

Electrical Engineering | Narula Institute of Technology

Jun 2018 - Jun 2022

CGPA: 8.65

LICENCES AND CERTIFICATIONS

- Certified **AWS Cloud Practitioner** (License No: Z20XRN715MQE1DS0)
- Google Cloud Certified **Google Cloud Digital Leader** (License No. - ZUTWZ6)
- Capgemini Certified **Java Full Stack Developer React - Level 1 & 2** (Issued by Capgemini)
